ORDER NOW!

Ideal for sporting events, stadiums, entertainment complexes, corporate campuses, professional venues, universities/campuses, fitness centers, resorts, hotels and more!

Certified Compostable Bottle, Cap & Label Benefits:

Certified ASTM-D6400

Made from plants... a renewable alternative to petroelum-based plastic!

Industrial Compostable Bottles, Caps & Labels are ideal for closed-loop applications where proper disposal and collection are possible. The bottles, caps and labels can be collected with food scraps and brought to industrial composting facilities. If composting is unavailable, they can be safely incinerated as clean-burning fuel for an environmentally-friendly end-of-life solution.

UrthPact manufactures its straws in Safe Quality Foods (SQF) certified plants in the USA to assure the highest levels of quality.
